

RoHS Certificate

We herewith confirm under our sole responsibility that all Rotary Cam Switches and Disconnect Switches manufactured by Sälzer Electric as of the 1st November 2005 fully comply with EU directive 2002/95/EC relating to the Restriction of Hazardous Substances (RoHS), such as lead, mercury, cadmium, hexavalent chromium; and flame-retardants used in plastics: poly-brominated biphenyls (PBBs); and poly-brominated diphenyl ethers (PBDEs).

Although our products are neither directly affected by RoHS nor by the EU directive 2002/96/EC relating to the Waste of Electrical and Electronic Equipments (WEEE) and the official deadline of implementation for RoHS is the 1st of July 2006 only, Sälzer Electric has taken the decision to adapt or substitute all relevant components and materials as quickly as possible.

This should be seen as Sälzer's contribution to the protection of human health and environment as well as a safety measure for our customers should our products, which are rather unlikely, become part of another type of equipment that falls within the scope of these directives.

Rochlitz / Wenden, 1st of November 2005

Hartmut Hecht
Managing Director
