

## New product line B200 - Types B250 and B263

The new product line B200 of Sälzer is an advancement of the proven disconnect switches H263 and was conceived by analogy of the product lines H200-A, H200-D and H200-E as 3-pole to 8-pole On-Off Switches and as 3-pole and 4-pole changeover switches. With new robust and generous box terminals, unloseable terminal screws, finger protected box terminals (IP20) for a maximum terminal capacity of 25 mm<sup>2</sup> essential advantages arise to the H263 one maximum terminal capacity of 16 mm<sup>2</sup> owns. B263 is fully replaceable to the H263. Nevertheless, remains of the H263 for the time being available.

Within the product line B200 two types are offered nowadays:

**B250** = 50A operational current to AC-21A,  
18.5 kW operational power to AC-23A with 380-400 V  
and

**B263** = 63A operational current to AC-21A,  
22 kW operational power to AC-23A with 380-400 V.

Beside a compact design both types in the identical mounting size offer an additional safety by forcible opening and compulsive-controlled closing of the contacts.

All proven mounting form modules and additional accessories for front and base mounting of the mounting size 200 are usable and are combinable with neutral contact module, auxiliary contact modules and N-and PE terminals.
